

Dr. Nesa Keshavarz Moghadam

Dr. Nesa Keshavarz Moghadam is a researcher and corrective exercise specialist focused on Parkinson's disease and musculoskeletal disorders. She is the Kinesiology Project Coordinator at Savvy Knowledge Corporation and a Research Assistant at the University of Alberta's Faculty of Rehabilitation Medicine. With a background in clinical work with elderly and neurodevelopmental populations, she integrates research and practice to enhance motor function. Her work includes postdoctoral research at the University of Calgary, publications on gait analysis and posture, and the development of innovative health solutions for individuals with Parkinson's disease.
