

ERIK O'HARA

Erik Ohara completed his undergraduate degree in Electrical Engineering at the University of Brasilia, Brazil, in 2013.

From 2010 until joining the MIPLAB in 2023, Erik worked at the Bank of Brazil, working as an Engineer and later as a Software Developer. He is currently pursuing a MSc in Biomedical Engineering with Medical Imaging Specialization. His research is focused on causal deep learning models applied on image data to answer counterfactual medical queries, under the supervision of Dr. Nils Forkert.
